

Cynomolgus M-CSF/CSF-1 Protein

Cat. No. CSF-CM101

Description

Source	Recombinant Cynomolgus M-CSF/CSF-1 Protein is expressed from HEK293 with His tag at the C-Terminus. It contains Glu33-Leu255.
Accession	XP_045221641.1
Molecular Weight	The protein has a predicted MW of 26.26 kDa. Due to glycosylation, the protein migrates to 45-55 kDa based on Bis-Tris PAGE result.
Endotoxin	Less than 1EU per μg by the LAL method.
Purity	> 95% as determined by Bis-Tris PAGE

Formulation and Storage

Formulation	Lyophilized from 0.22 μm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
Reconstitution	Centrifuge the tube before opening. Reconstituting to a concentration more than 100 $\mu\text{g}/\text{ml}$ is recommended. Dissolve the lyophilized protein in distilled water.
Storage	-20 to -80°C for 12 months as supplied from date of receipt. -80°C for 3 months after reconstitution. Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

Background

CSF-1, also known as M-CSF, is a four α -helical-bundle cytokine that is the primary regulator of macrophage survival, proliferation and differentiation. CSF-1 is also essential for the survival and proliferation of osteoclast progenitors. CSF-1 is cytokine that plays an essential role in the regulation of survival, proliferation and differentiation of hematopoietic precursor cells, especially mononuclear phagocytes, such as macrophages and monocytes. Promotes the release of proinflammatory chemokines, and thereby plays an important role in innate immunity and in inflammatory processes. This mutation leads to a deletion of exons 2-7 of the EGFR gene and renders the mutant receptor incapable of binding any known ligand.

Assay Data

Bis-Tris PAGE

Cynomolgus M-CSF on Bis-Tris PAGE under reduced condition. The purity is greater than 95%.

ELISA Data

Cynomolgus M-CSF, His Tag ELISA
0.1 μg Cynomolgus M-CSF, His Tag Per Well

Immobilized Cynomolgus M-CSF, His Tag at 1 $\mu\text{g}/\text{ml}$ (100 $\mu\text{l}/\text{well}$) on the plate. Dose response curve for Human M-CSF R, hFc Tag with the EC50 of 6.5ng/ml determined by ELISA (QC Test).

Assay Data

SPR Data

Cynomolgus M-CSF R, His Tag immobilized on CM5 Chip can bind Cynomolgus M-CSF, His Tag with an affinity constant of 0.889 μ M as determined in SPR assay (Biacore T200).
